

2024 Transformation Grants for IDD Research

The number of American children diagnosed with a developmental disability continues to increase, according to the Centers for Disease Control and Prevention, and more than one in 10 children have an intellectual disability, autism spectrum disorder, or another developmental delay.

The need for earlier diagnosis and impactful therapies persists, and longstanding socio-economic and political conditions produce obstacles for people with IDD to receive equitable, appropriate, and effective physical and mental health care, further contributing to poor outcomes.

While the exploration and advancement of therapies and treatments is a key component of this program, we also invite efforts that remove barriers to care, prioritizing equitable and informed access to IDD screenings, diagnosis and therapies.

Project Brief Question List

1. Project Name
2. Amount Requested
3. Duration of Grant
4. Grant Start Date
5. Grant End Date
6. What is the primary focus of the research project
7. Two-page project abstract addressing:
 - a. Summarize the project, approach, objectives, and the need being addressed
 - b. Project duration
 - c. Briefly describe your project leaders, their expertise, the role that each will play in the project and what percentage of their time will be allocated to the project.
 - d. Describe the departments, institutions and other stakeholders engaged in the work and the level of engagement and data sharing.
 - e. Describe how you will evaluate the impact of the research
